DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 04/25/2006 has been entered.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance claim 1 is that the prior art of record does not teach the controller which controls the operation of the print head to control print margins of right and left edges of the paper according to left and right edge detections signals of the second paper sensor, and to control print margins of top and bottom ends of the paper by comparing first top edge and first bottom edge signals from the first paper sensor and second top edge and second bottom edge signals and determines a print start timing based on the first top edge signal and a speed of the paper moving through the printer, or the second top edge signal from the second paper sensor.

The primary reason for allowance claim 9 is that the prior art of record does not teach the steps of detecting a left edge or right edge of the sheet of paper when the second paper sensor moves transversely and generating a begin print command at a later of the start print time interval and the second top edge detection signal, and generating an end print command at a later of the end print time interval and the second bottom edge detection signal.

The limitations in the claims are not rendered obvious by any proper combination of the prior art known to the Examiner.
